

Interpretasi Regresi

Hasil regresi menunjukkan slope positif sekitar Rp190.528 per bulan. Namun nilai R^2 hanya sekitar 0,048, sehingga tren waktu linear hanya menjelaskan sekitar 4,8% variasi Total Sales bulanan. Dengan demikian, terdapat kecenderungan naik yang sangat lemah secara linear, sementara sebagian besar variasi kemungkinan berkaitan dengan pola musiman, promosi, perbedaan cabang, produk, perilaku pelanggan, atau faktor lain yang tidak dimasukkan dalam model.
